

LEFT UNDONE

(SCOOT)

At night I heard Howls and Fires
And then I started to cry
There was only a thing that come to mind
The light, the death outside

(Oh) no, once again
They will pay, bloody world
But no way, I can't stand
With this pain when my eyes got dark

I'm here to struggle with one, one last breath
I'm here to look at one, one last chance
While they are burning and days go to hell
Stand up like never before
Stand up like never before!

So alone I watched the faceless men
They laughed and didn't care
The atomic bomb bursts by their hands
My revenge was left undone

(Oh) no ,once again
They will pay, bloody world
But no way, I can't stand
With this pain when my eyes got dark

I'm here to struggle with one, one last breath
I'm here to look at one, one last chance
While they are burning and days go to hell
Stand up like never before
Stand up like never before!
